

Reset OneDrive

Resetting Microsoft OneDrive can sometimes resolve sync issues and resets all OneDrive settings. OneDrive will perform a full sync after the reset.

Important: You won't lose files or data by resetting OneDrive on your computer. Resetting OneDrive only disconnects all your sync connections (including personal and work or school).

Windows Mac Android iOS

Follow the steps below to reset your OneDrive app

1. On your computer keyboard, press the **Windows** key  and **R** at the same time to open the Run dialog box.

2. Copy or type `wsreset.exe` into the box then select **OK**.

Note: A blank Command Prompt window will open and close briefly, then the Microsoft Store app will open. You can ignore these and close any unwanted windows.

If OneDrive is still not syncing, let's continue with resetting the OneDrive sync app.

3. Press the **Windows** key  and **R** again.

6. If you still see a "Windows cannot find..." message, copy and paste the text below instead, then press **OK**.

```
C:\Program Files (x86)\Microsoft  
OneDrive\onedrive.exe /reset
```

Note: If none of these steps work, you do not have the OneDrive sync app installed. [Learn more](#).

7. Manually restart OneDrive by going to **Start** , type **OneDrive** in the search box, and then click on the **OneDrive** desktop app.

Notes:

- If none of these steps work, you do not have the OneDrive sync app installed. [Learn more](#).
- If you had chosen to sync only some folders before the reset, you will need to do that again once sync has completed. You will need to complete this for your personal OneDrive and OneDrive for work or school accounts. Read [Choose which OneDrive folders to sync to your computer](#) for more
